

Cleaning Drum with Infrared Heating CHD

CLEANING DRUM WITH INFRARED HEATING

The cleaning drum with infrared heating has the same purpose as the cleaning drum but also has a drying stage with 8 infrared segments of 1.800W to heat up the product and reduce its humidity before it goes to the seasoning and packaging stage. The cleaning drum with infrared heating is necessary when producing corn grit or certain cereal based products. It is necessary to bring the humidity of corn grit based products further down to improve the shelf life and overall product quality and stability.

The cleaning drum with infrared heating is equipped with temperature control, individual switches to toggle the heating elements and a frequency control to control its rotation speed. It is manufactured in stainless steel AISI 304.

Technical Data

DIMENSIONS	WIDTH	900mm
	DEPTH	2920mm
	HEIGHT	1700mm
	WEIGHT	460kg
INSTALLED POWER	0,25KW + HEATING	
VOLTAGE	3 X 400V -460V, 50-60HZ	
HEATING	8 x 1800W = 14400W
